Subject: Project review, Nino Berube

Mike,
Laura,

On June 15, 2018, Colleen Owen and Dick Sloan met with Nino Berube to review the status and progress of the CFAC RIFS. This meeting was held at the DEQ Kalispell, MT. office.

We emphasized to Nino that the overall objective of the RIFS and the risk assessments was to develop a timely remedial response plan to reduce the site risk to acceptable levels and to expedite beneficial future reuse of the property.

We also emphasized that the RI, phase 1&2, the HHRA, and the BERA will enable CFAC and the agencies to develop a remedial response plan for public review and comment..

It was recognized that the site has a lot of significant history, however the current RIFS and risk assessment work is focused on site remediation and redevelopment.

The meeting lasted about 80 minutes, and we encouraged Nino to access the various reports as they become available.

Dick Sloan
